

WipeDrive Enterprise Earns NCSC Commercial Product Assurance Certification

WipeDrive Enterprise has received certification by the British National Cyber Security Centre (NCSC) Commercial Product Assurance scheme (CPA) for data sanitization. This certification process involved fifteen months of in-depth testing and evaluation of the WipeDrive software. And it provides organizations in the United Kingdom with a trusted solution for erasing IT assets. This is the second time WipeDrive Enterprise has received this certification.

National Cyber Security Centre

The National Cyber Security Centre (NCSC) is the UK's authority for cyber security guidance and support. The NCSC supports the most critical organizations in the UK and responds to incidents throughout the UK. The NCSC is also responsible for providing academic and industry expertise to help mature the UK's cyber security expertise and reduce the risks of cyber attacks to public and private sector networks.^[1]

National Cyber Security Centre

Commercial Product Assurance

The CPA certification provides public and private sector organizations in the UK with products that have been tested by an independent organization to ensure they perform as the company has described. This certification process is in-depth and comprehensive to ensure only the best products receive this status.

WipeDrive Enterprise was independently evaluated and as a CPA listed product it can be incorporated by small, medium and global corporations in the UK to securely erase their data-bearing devices. It also allows the tool to be used across the healthcare, financial, IT security and educational industries throughout the United Kingdom.

The CPA certification also allows WipeDrive to be used to erase data classified as 'Official' by the UK's Government Security Classification Policy.

Impact

The NCSC certification of WipeDrive Enterprise provides UK organizations for an alternative for their data erasure needs. The HMG Infosec Standard 5, Lower and Higher Standards; NIST 800-88 and DoD 5220.22-M overwrite patterns are certified in WipeDrive and help companies comply with GDPR and the Data Protection Act.

WipeDrive Enterprise Features:

- Computer Diagnostics
- Drive Erasure Verification
- NVMe Drive Compatibility
- Opal Drive Compatibility
- SCSI/SATA/IDE Compatibility
- Certified Erasure

Report

- DCO Lock Removal
- RAID Disassembly
- TPM Chip Erasure
- QR Code Report

We know it's important when choosing a data sanitization software that you know what to expect. WipeDrive Enterprise has and continues to receive the highest levels of certification throughout the world. For more information on implementing WipeDrive in your institution, contact our Sales Team at [1-800-920-8162](tel:1-800-920-8162) or visit www.WhiteCanyon.com.
